Oct-20	653	97		12	503	75		10

ND = Below detection limits of 10 MPN/100 ml; the detection limits is used in the geometric mean calculation

* This sample was not tested in time, so the high results reflect growth of the bacteria while the sample sat untested.

LIMITS FOR CONTACT RECREATION

	MPN/ 100 ml
Total Coliform	
Single Day	10,000
30-day Geomean	1,000
<i>E. coli</i>	
Single Day	400
30-day Geomean	200
<i>Emterococcus</i>	
Single Day	104
30-day Geomean	35
